            ②wireless Android Auto.

5. Android phone enter MirrorLink mode (Wired only).

6.The mode entered by default when an Android Phone is× connected."Android Auto/Mirrorlink / nothing" is selected.
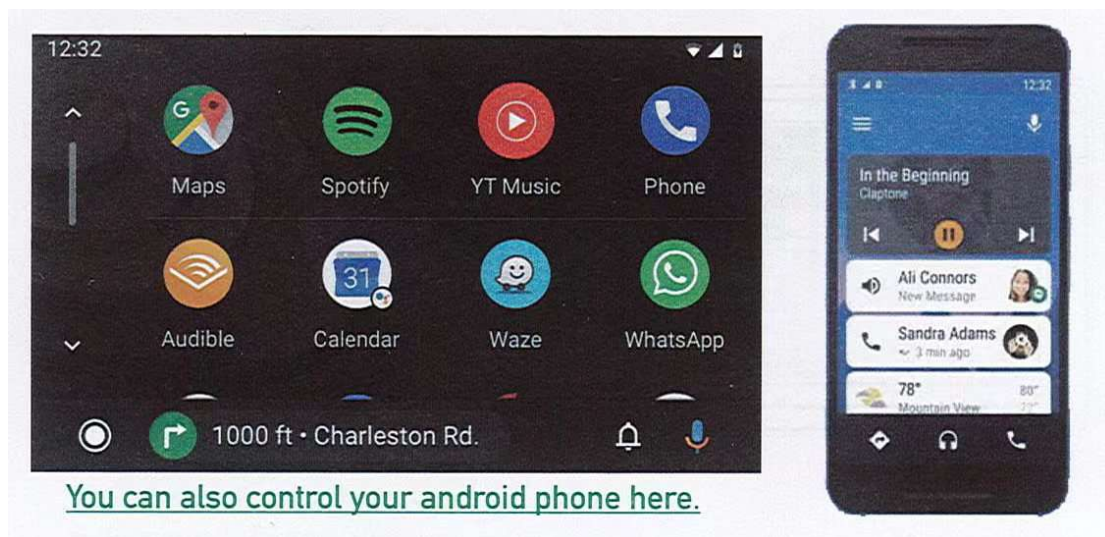

7.Wifi Select

Apple CarPlay (wired & wireless)

You can also control your iphone here.

1. Wired connection: Just connect the USB data cable, and then it will automatically enter the CarPlay interface.

2. Wireless connection: first turn on the bluetooth and wifi functions of the mobile phone, and then connect the bluetooth. Then it will automatically enter the CarPlay interface. (Note: The sianal is transmitted through wifi at this time so even if the Bluetooth function is turned off it will be transmitted normally When the wifi function is turned off. CarPlay will be disconnected.)

Android Auto(wired & wireless)

This feature is not supported in all countries, and "Google Play" services need to be available locally.

You can also control your android phone here.

1. Need to download and install "Android Auto" software in "Google Play".

2.A mobile phone with Android 6.0 or higher must be used. Must use a valid data cable connection.

3. Wired connection: Just connect the USB data cable, and then it will automatically enter the Android Auto interface.

4. Wireless connection: First turn on the Bluetooth and wifi functions of the mobile phone, and then connect the Bluetooth. Then it will automatically enter the Android Auto interface. (Note: The signal is transmitted through wifi at this time, so even if the Bluetooth function is turned off, it will be transmitted normally When the wifi function is turned off, Android Auto will be disconnected.)

Mirrorlink (iPhone)

When the device is plugged into the iPhone, the content on the phone's screen is projected onto the car's screen, and the sound is transmitted in sync

Mirrorlink (Android)

When using an Android device, after connecting the USB data cable, you will be prompted to install the Mirrorlink software. After installation, Plug the data cable again, it will enter the screen mirroring mode. And it can be operated on both the player screen and the phone screen.
Only the image transfer is successful at this time. The sound can only be transmitted after the BT connection is successful.

COMMON PROBLEMS AND SIMPLE TROUBLESHOOTING

1) Car audio with BT but it can't work
-- Check the phone to see if you can search for the unit code
Operation steps: turn on the unit, use the phone BT search device, then click the connection, after connecting. you can answer the phone or Bluetooth to play the song.

2) USB flash disk can not be played, the card slot does not enter the card?-- USB flash disk can not play:
Format the USB flash disk, and the file system is selected as: FAT32,re-download on or two songs and try again. If it still doesn't work, please replace the USB flash drive.--- The card slot does not enter the card:
Check whether the memory card is inserted, the plug is broken.

3) There is no sound right after installation
The audio output of this machine is to broadcast the sound by transmitting FM signal to the radio of the original car. So it is necessary to check whether the original car radio receives
the frequency of FM transmission.
